# NH DHHS COVID-19 Update – November 30, 2020

**Concord, NH** – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Monday, November 30, 2020, DHHS announced 514 new positive test results for COVID-19, for a daily PCR test positivity rate of 5.5%. Today's results include 287 people who tested positive by PCR test and 227 who tested positive by antigen test. There are now 5,145 current COVID-19 cases diagnosed in New Hampshire. Of the results reported today, 265 new positive test results are from Saturday, 11/27 and 249 new positive test results are from Sunday, 11/28. Test results received Sunday are still being processed and the total number of new positives for that day is not yet complete. Updated case counts for prior days will be reflected on the COVID-19 interactive dashboard.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are fifty individuals under the age of 18 and the rest are adults with 51% being female and 49% being male. The new cases reside in Rockingham (119), Hillsborough County other than Manchester and Nashua (81), Merrimack (52), Strafford (26), Cheshire (20), Belknap (19), Coos (11), Carroll (10), Grafton (9), and Sullivan (2) counties, and in the cities of Manchester (108) and Nashua (43). The county of residence is being determined for fourteen new cases.

Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or are associated with an outbreak setting.

There are currently 160 individuals hospitalized with COVID-19. In New Hampshire since the start of the pandemic, there have been a total of 20,994 cases of COVID-19 diagnosed with 839 (4%) of those having been hospitalized.
