

Fetal Alcohol Spectrum Disorders (FASD)

Virtual!

Are you FASD informed in your work or practice?

TUESDAY
NOVEMBER 16, 1:00 - 2:00 PM

Join us!

<https://bit.ly/FASD-Informed>

Attendees will:

- **Define the terms** used to describe the conditions that fall under the umbrella of fetal alcohol spectrum disorders (FASD), and the areas of the brain affected by prenatal alcohol exposure
- **Describe characteristics of individuals throughout the lifespan with a FASD** and the domains in which children and adults with a FASD struggle with behavior and developmental tasks
- **Be FASD informed and apply strategies and tools to working with clients**

AUDIENCE INCLUDES:

LAW ENFORCEMENT, PAROLE OFFICERS, JUDGES, COMMUNITY HEALTH WORKERS, HEALTH, HUMAN, AND SOCIAL SERVICES WORKERS, LADCS, MAT PROVIDERS, RECOVERY COACHES, CASE MANAGERS, SAP...

Background: Called the "invisible disability," fetal alcohol spectrum disorders (FASD) is a permanent, brain-based disability that has often gone undiagnosed. **Lifelong effects from FASD** include: disrupted schooling, substance misuse, mental health problems, and involvement with law enforcement. Studies have shown that **1 in 20 children may be affected.**
