Day Camp
July 11 - July 15, 2011
and
July 18 - July 22, 2011

White Mountains Community College and North Country Health Consortium's Science, Technology, Engineering, Mathematics, and healthcare Careers, (STEM - Health) camp is an outreach program initiated by the New Hampshire Experimental Program to Stimulate Competitive Research (EPSCoR) and sponsored by White Mountains Community College and North Country Health Consortium.

This STEM - Health camp is designed to introduce youth to the world of engineering, technology, and healthcare careers.

The camp engages young people entering grades 6 through 8 in problem-solving, hands-on activities as they explore areas of science, technology, engineering, and mathematics.

Lego Robotics

Global Positioning Systems

This camp is designed to be introductory and project - based for students who are interested in the world around them and the way things work. Students should have a desire to engage in scientific inquiry and be interested in science, technology, engineering, mathematics, and healthcare professional careers.

Students will be very active.

WMCC is handicapped accessible. If you have a child in need of individual instructional aids, please discuss your concerns with Jody Camille by calling 603-752-1113 ext. 3019 or email jcamille@ccsnh.edu prior to registering your child for STEM—Health camp.

WHITE MOUNTAINS COMMUNITY COLLEGE

Registration Information

Camp Tuition:

Full scholarships provided to all attendees by a generous grant from New Hampshire Experimental Program to Stimulate Competitive Research (NH EPSCoR)

Registrations may be submitted by mail or in person to:

Ms. Jody Camille, Director
WMCC STEM - Health Camp
